(54) Title: JOINERY PANEL ACCESSORY SYSTEM

(57) Abstract: The present invention relates to a panel accessory system for a movable panel of a joinery system. This accessory system can include a locking system incorporating a catch associated with the leading edge of the panel to be secured. The locking system also includes a locking member associated with a panel receiving face of the joinery system where this locking member is to be engaged by the catch to secure the movable panels. In some embodiments the panel accessory system may also include a panel sheet accessory which incorporates a main body portion which is adapted to fit at least in part between a framed sheet material incorporated into a panel and the leading frame portion of such a panel.
